Preciosa Ornela makes the world's best seed beads.

Preciosa Ornela is the biggest and most significant international manufacturer of glass seed beads. The seed beads sold under the PRECIOSA Traditional Czech Beads brand are the world's best. This unique product is incomparable with any other type of bead due to its technology and appearance, the breadth of the product range and the product's properties.

We are the only European manufacturer of these beads and we successfully compete with other manufacturers from Japan, China and India.

Our fundamental asset is the complexity and breadth of our product range and our top production quality. We manufacture and sell the widest range of seed beads in the world – nobody in the world can compare with us from the point of view of the shapes, sizes, colors and surface finishes of the beads. The types of goods, which we produce and sell, number in the hundreds of thousands for seed beads alone. All of these beads are top-quality products with traditional service and an accessible price.
